

**SMILE ART ORTHODONTICS**  
**Care and Maintenance of Your Braces**

**BRUSHING:** Keeping your teeth clean is very important to prevent white spots and cavities on the teeth and to keep your gums healthy.

- You should brush your teeth at least three times a day or after every meal (whichever is more).
- Brush in a circular motion over each tooth; make sure you clean the area between your braces and gums.
- Once a day, use a proxy brush to clean under the wire, where your regular toothbrush cannot reach.
- Once a day, floss between teeth with the help of a floss threader.
- A water-pik may also be used to get to hard-to-reach areas around brackets and under the wire.

**FLUORIDE:**

- Please rinse with a fluoride mouth rinse three times a day. After rinsing, do not eat or drink anything for at least 1/2 hour. DO NOT SWALLOW THE FLUORIDE MOUTH RINSE.

**FOOD:** Do not have hard and sticky foods, avoid in-between meal snacks, minimize foods high in sugar content, and brush after you eat.

*Guidelines:*

- Do not chew gum.
- Do not eat chewy or sticky candy (caramel, jelly beans, gummy bears, starbursts etc.).
- Do not bite hard candies (jawbreakers, lollipops, etc.).
- Do not bite into sub rolls or pizza crust. Break off bite-size pieces and chew on your back teeth.
- Cut apples and carrots into small pieces/thin slices and bite with your back teeth.
- Do not eat peanuts or bite on ice cubes.
- Cut meat from the bone and chew on back teeth (spare rib, chicken, etc.).
- Remove corn from the cob.
- Keep pens, pencils, and fingers out of your mouth.

**BREAKAGE:**

- Every night after you brush your teeth, look at your teeth and check your braces. If something is broken or loose, call and inform our office the next day.

**PLEASE BRUSH YOUR TEETH BEFORE EACH APPOINTMENT**

*Thank you for your cooperation
